

Matías Moreno

Senior Frontend Engineer | React & TypeScript | Scalable UI Systems Tigre, Buenos Aires | 11 6353 7809 | matiasmorenog@gmail.com **LinkedIn:** [linkedin.com/in/matias-moreno](https://www.linkedin.com/in/matias-moreno)

PROFESSIONAL PROFILE

Senior Frontend Engineer with extensive experience developing high-demand SaaS platforms and B2B solutions, specializing in **React** and **TypeScript**. I have worked in complex environments such as banking, healthcare, and global certification platforms, providing a focus on performance, scalability, and product quality. I excel at building robust, maintainable, and user-oriented interfaces, combining frontend architecture best practices with testing and continuous improvement. I have a proven track record of leading the evolution of production systems, optimizing performance, and ensuring consistent experiences for thousands of active users.

WORK EXPERIENCE

Frontend Engineer | INE

2022 – 2025

- Developed frontend features for SaaS learning platforms focused on cybersecurity, networking, and cloud.
- Implemented solutions for B2C and B2B products serving thousands of active users.
- Built and maintained scalable applications using **React.js**, **Vue.js**, and **TypeScript**.
- Optimized performance and enhanced user experience through refactors and iterative improvements.
- Implemented unit and integration testing to ensure stability and prevent regressions.
- Actively participated in code reviews and improved code quality standards.
- Collaborated with backend and product teams to define technical solutions.
- Developed complex flows such as subscriptions, certifications, and user management.

Software Engineer (Fullstack) | Santander Tecnología Argentina

2021 – 2022

- Participated in internal training programs regarding banking processes, security, and enterprise architecture.
- Provided support and maintenance for legacy systems.
- Resolved incidents in **SQL Server** stored procedures.
- Gained experience in regulated environments with high security and compliance standards.

Software Engineer (Fullstack) | Genetrix

2021 – 2021

- Developed applications for the healthcare sector during the COVID-19 pandemic.
- Built React interfaces to optimize hospital workflows.
- Developed patient screening systems designed for minimal physical interaction.
- Integrated with government APIs for COVID-19 case reporting in Argentina.
- Implemented frontend best practices in teams undergoing technological transitions.

Software Engineer (Fullstack) | Envone

2015 – 2021

- Developed and evolved a modular CRM platform for enterprise clients in Latin America.
- Implemented key functionalities using **Node.js** and **Vue.js**.
- Developed modules for sales, billing, automation, and operational management.
- Maintained production systems with high business criticality.
- Continuously improved performance, stability, and user experience.
- Worked in agile teams (Scrum) with iterative value deliveries.
- Participated in technical decision-making and long-term product evolution.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3.
- **Backend:** Node.js, Nest.js.
- **Databases:** SQL.
- **Testing:** Mocha.js, Jest, Cypress (Unit & Integration).
- **Other:** Scalable Frontend Architecture, Performance Optimization, Code Reviews, Agile Methodologies (Scrum), SaaS Product Development.

EDUCATION

- **Higher Technical Degree in Programming** | Universidad Tecnológica Nacional (UTN) | 2012 – 2015.
- **Bachelor's in Economics and Administration** | Colegio San Martín de Tours | 2007 – 2010.

CERTIFICATIONS & LANGUAGES

- **Certifications:** Stock Market Diffusion Program (PRO.DI.BUR), Microsoft Office Suite (Advanced/Intermediate).
- **Languages:** English (Professional - B2 Level).
